PRIDAY, NOVEMBER 14, 1879. We have had a very quiet week, but little business of any kind being transacted. Mr. C. S. Bartow held a large goods from Europe, at which the attendance was full and the bidding spirited. Fair prices were realized, considering the times, and goods were disposed of to the value of something over \$15000. The sale will be continued on

In regard to the agricultural state of affairs, we learn that about twenty sugar mills, large and small, are now grinding, and four more will commenence within ten days. In December, say about the 15th to 20th there will be thirty grinding; in January, 15th to 20th, forty; and in February forty.five-always provided that wind and weather permit, and no accident intervenes. In very had weather some have to stop; and from some points it is impossible to ship sugar even when the weather admits of grinding. There will not be a large quantity of sugar at hand before the next steamer leaves for San Francisco; but with favorable weather the receips in December should be large. Lately the weather has been more favorable for grinding cane than for making sugar. We regret to hear of the loss of some machinery lately at Pasuhan, caused by the recent " Norther," and also at Huelo, by a freshet.

There have been four arrivals this week-two of lumber, one from New York with mose to Castle & Cooke,

ALONG THE WHARVES. The Am bitne Laura H Burnham, arrived yesterday,

34 days from New York, with a general cargo, o Mesars Castle & Cooke; she has hauled in to Brewer & At Allen & Robinson's wharf, the Am bkine Catterins Sudden is discharging a cargo of lumber. Scott-Malupo-In this City, Nov. 10th, by the Rev. M. Knass, Mr. John Scott of the Honolulu Ice Manufac-tory, to Malupo, a Hawaiian.

THE PACIFIC Commercial Adbertiser.

SATURDAY, NOVEMBER 15. FRIDAY, the 28th inst. being the thirty-sixth anniversary of the recognition of Hawaiian independence by France and England, will, as usual, be observed as a public holiday.

His Majesty's birth-day occurs on the 16th of November, which coming this year on Sunday (to-morrow), will be kept as a holiday on Monday next. The King will spend his birth-day out of town, proceeding as we learn to Ewa today, where on Monday there will be a regatta of row beats, and we hear that a horse-race is on the tapis. In the city the day will of course be a very quiet one, though some of the horse fanciers may possibly get up a horse-race on the Park for Honolulu. The vessel has been fitted up for the

In advance, in common with the nation at large, we very heartily wish His Majesty many happy returns of the day. Long Live King KALAKAUA!

For one of the most astounding pieces of editorial obtuseness, combined with grovelling and nauscating personal flattery, see the article in this week's Gazette under the heading " The Chinese Problem." For wonderful stupidity it really surpasses any of the previous performances of that journal in this particular line. Any one who will read the letter of Mr. Whitney referred to on the Chinese question, will see that so far from being a philo-Mongolian in principle, as is the editor in question, he is in fact most decidedly in favor of the policy which has all along been advocated by the ADVERTISER,-that the government should speedily adopt any suitable measures designed to check the increase of the Chinese in these Islands. And yet the editor in question proceeds (in a Pickwickian sense) to pat Mr. W. on the back, and in a patronizing way tells him that, besides being a man of candor, deliberation and good common sense, he has the great good fortune to be on the same side of the question | Colonies, yet the Chinese Government, having with that paragon of wisdom and consistency, the made up its mind to appoint representatives in al reputed editor himself! This is the perfect acme of one of two things-either stark stupidity or brazen impudence.

THE U. S. Treasury Department, under the control of our good friend Secretary Sherman, evidently watches closely to see that we Hawaiians get no undue advantages under the Treaty. In the schedule of free goods is the following : " Cotton and manufactures of cotton, bleached

and unbleached, and whether or not colored, stained, painted, or printed."

construction demanded.

Our customs authorities, very reasonably we think, construed this to mean cotton goods, Company design later on to extend the line to Calisuch as sheetings, long cloth, calicoes, and such think, construed this to mean cotton goods, like piece goods, but not to include ready made themselves a large share in the passenger traffic clothing. But the Treasury Department at Washington has decided that it does mean and this is to be an experimental trip. Uponlits suceverything made of cotton, including articles of cess or otherwise, and that of Mr. Moreno's misear, and has made a formal demand on this sion, will of course depend the carrying out of the overnment so to construe it. Of course, though Sandwich Islands alone, although capable of great we may differ in opinion with the Secretary, we development, could scarcely be expected to pay are not in a position to dispute the point. We Peru, and emigration to that country is sanctioned understand the Government have conceded the by the Chinese Government, then the project

sale at Auction on Wednesday and Thursday of cargo have doubtless come to look into their circum- the bark Kalakaua from San Francisco. How the success in obtaining fresh supplies of these desirable immigrants, with which to recuperate our native population. By our last census it appeared that there was 2,688 more male native Hawaiians than females. At Rotuma the females outnumber the males. It is unnecessary to enlarge upon the demoralizing, not to say dangerous position which Hawaii nei occupies as compared with Rotuma in this respect, more especially in view of the increasing arrivals of male Chinese at these Islands. Now would it not be a sound policy on the part of the Board of Immigration to make an effort to procure some of these surplus Rotuma woman to help restore the parity between the sexes? The people of that Island are not heathens, having been Christianized many years since. Probably the influence and good offices of the chiefs now and the steamer from China—the latter's cargo consisting of Chinase males. There was but one departure, the Lary Lampson for San Francisco, with domestic produce valued at \$50,758,16. sland to emigrate to Hawaii. Possibly after the arrangements had been completed, one of the from Australia, might be induced for a fair comthe Island is not very far off from the regular route, and the detention would therefore be

> THE OPPOSITION to the Hawaiian Reciprocity Treaty, which so doggedly labored to prevent its passage in Congress in the Sessions of 1875-6. appears to be reviving again with all its bitterness and more than its former unfairness of statement. Telegraphic dispatches represent that a very strong endeavor will be made during the coming session to abrogate the Treaty. Mr. Sherman, Secretary of the Treasury, who it will be remembered opposed the Treaty while in the Senate, now gives countenance to the idea that the increased consumption of Hawaiian sugar in California unfavorably influences the production or sale of Louisiana sugar. The fallacy of such a the ory is and has been easily proved; as also of that other absurdity, that foreign grown sugars are smuggled into California as Hawaiian; but yet the statements reappear periodically in some of the Eastern papers. The opinion prevails in Calisume importance owing to the countenance givlead him to conciliate public opinion at the all properly manifested. South. Says the S. F. Post:

"By encouraging the belief that the sugar incompetition, he makes political friends in quarters | John in this respect. otherwise hostile, and although he must know that venue or an economic standpoint, he nevertheless makes political capital out of it by saccsuch an opinion. The total area of the Hawaiian group, including mountain, rock, forests and desolate wastes, is 6,100 square miles. Only a very limited area is capable of sugar cultivation, and little can be done without irrigation, towards which San Francisco capitalists have contributed a large sum, and in time hope to reap the reward of their enterprise. Many hundred square miles of Hawaii are covered with recent and barren lavas, and it is liable to violent and frequent volcanic action, which invariably curtails the area of cultivable soil. Louisiana alone has an area of 41.346 square miles, most of it rich and alluvial soil. It is an old and populous state, rich in natural and acquired wealth, and crowned with grand historic associations. For Louisiana, thereore, with its peculiar advantages and wealth, to ery out against the competition of a mere handful of Kanakas and Chinamen, in the sngar patches of the volcanic islets of the Hawaiian archipelago, is

Nearly the entire press of California has been outspoken in favor of our Treaty, for the people of that state see and appreciate the advantages it has afforded them in the increase of their trade as well as giving them cheaper sugar. But by far the best informed and most energetic advocate of the Treaty there is the S. F. Merchant, whose carefully prepared statistics on the subject we reprinted in our last. In the Supplement accompanying to-day's paper will be found two well- written editorials on this subject from the same source. If however the attempt should be seriously made to abrogate the Treaty, we really have no fears of its success. Ratified in 1876. it must, by its own terms, run to 1883, and twelve months thereafter. No abrogation can take place in the meantime unless its opponents can prove that we have been guilty of fraud in carrying out its provisions; and that, we apprehend, no one would be insane enough to think

From China.

The China Merchants' steam navigation Company's steamer Ho-chung, Capt. Peterson, arrived at this port yesterday morning, 26 days from Whampoa. She has 451 Chinese passengers, 13 of whom are women. The Hongkong Daily Press of Oct. 11, under the head of "Chinese Emigration under the Dragon Flag," says: "The Chinese authorities have struck out a new departure. Not only is emigration -by ancient law prescribed -to be sanctioned by treaty, but it is in the future to be conducted under the Dragon Flag. The China Merchants' Steam Navigation Company's steamer Ho-chung is to load with Chinese coolies at Whampon purpose, and carries on board Mr. C. C. Moreno. who is to act as agent for the Company in Hawaii, and open negotiations with the Government of that country with a view to the establishment of regular steam communication between Honolulu and China. Of course the grand idea is to open up a new field of enterprise for the China Merchants' Company, that pet monopoly of the Chinese Government. No one can blame them, however, for seeking to obtain a share in a most legitimate trade. The Chinese in Hawaii are flourishing and prosperous, and the emi-gration thither has uniformly been voluntary and bona fide. The Chinese Government certainly would not allow the native steamer company to engage in it, did it feel any doubts on the subject." We think it probable that the despatch of the Ho-chung is but the commencement of an attempt on the part of the Chinese Government to control all the emigration to foreign countries, except perhaps British Colonies."

The same paper under date of Oct. 13, speaking on this subject says: "The determination to strike out in a new field is a bold one, and displays a spirit of enterprise on the part of the company which could hardly have been expected. The fact is, however, that the Company is backed up by the Chinese Government, which desires to enter into treaty relations with the kingdom of Hawaii. At present, though here is a large resident Chinese population in the islands, there is no Chinese representative. Although the Chinese in Hawaii are thriving and content, and suffer from no special imposts as is the case in the Pacific States of America and Australian countries where there are Chinese communities, has thought it desirable to make a commercial treaty with Hawaii. For this purpose Mr. C. C. Moreno the well known Trans-Pacific cable projector, has agreed to proceed to Honolulu in the steamer Hochang. He is well acquainted with King Kala-KAUA, and will no doubt be able to show His Maj esty that considerable benefits will accrue to Hawaii from regular commercial intercourse with China and that steam communication with China will help forward the telegraph project. It is de-signed, if practicable, by the China Merchants' Company to establish regular steam communica-tion between Canton and Honolulu, not only for the conveyance of passengers and cargo but to give postal facilities to the Chinese in Hawaii. Moreover. Honolulu is intended merely as the first step towards a much more ambitious scheme. The between those ports and China. The Hochung is now loading with emigrants and cargo at Canton.

might turn out very profitable."

WE LEARN that there are two chiefs of the Is- To the Edstor of the Pacific Commercial Advertiser: land of Rotuma now quartered at the Hotel. As Siz: Last Wednesday's Gazette has an unusually there is quite a number of their countrymen here long "Note of the Week" on the subject of the engaged as laborers on plantations, these chiefs opium found concealed in some firewood brought by stances, treatment, &c. and upon the report made opium got inside the firewood I do not care to comby them to their people will depend our future ment on, but the article says the " transaction looks very much as if some other persons than Chinamen were interested in the shipment." I am one of the other persons, but deny having had any hand in it, bark Kalakana is simply by register; still I believe

I am fairly well informed in regard to the suspicious When the Kalakaua was in the port of San Francisco last voyage, a Chinaman called at the vessel several times in regard to some firewood he wished to ship to Honolulu, saying he had 20 cords. The same party had tried to get it on board the Cyane, but that vessel did not have the room left. When the Kalakaua agreed to take it, it was sent down in a one-horse dray. The mate informed the shipper that he could not be troubled measuring each small lot and giving a receipt, but would stow it away at their convenience, giving a receipt for the in 30 days after Nov. 1st. I will claim the watch. twenty cords more or less (measuring it at Honolulu if they thought there was more), and as usual enter the same on the cargo-book, which is used as a reference in making up the ship's clearance and discharging of the cargo. The shipper never applied for a receipt, therefore it never got in the cargo-book, and by that means was overlooked in making up the manifest. It seems, however, a clerk from the office of J. C. Merrill & Co. was on the wharf steamers of the P. M. Co's line, on the passage one day when the wood was being taken to the vessel, and inquired what wood it was, and was told by pensation, to stop at Rotuma for immigrants, as the drayman that it belonged to Tong Kee, and that there was 20 cords of it, which he noted in his memorandum book, and by this means it was put in the freight list in closing up the papers.

The other very suspicious circumstance, " that the firewood was not entered on the ship's manifest at San Francisco or by the captain." The simple fact is, the captain had nothing to guide him in making such an entry but his memory. Captains make out their manifests from bills of lading and compare them with cargo-book. This is presumed to cover every article on board except small parcels in the cabin, which the captain generally overhauls and adds before he enters the port. Freight lists are sent to vessel's agent. It would appear that those in the opium business as a general thing do not care to have bills of lading. The broom opium by the Lady Lampson came in like manner-no bill of lading,- hence the captain of that vessel neglected to put it on his manifest. I would recommend to those engaged in this business to have all the papers prompt in entering, &c.; their chances would be much improved by doing so, and it tends greatly to save innocent persons from suspicion,—although perhaps not in all cases. The shoe-heel opium case was a success; the type and oil adventure not alto-

If Captain Jenks told Mr. Markham that he had no Chinese freight or freight for Chinese on board, he certainly believed so at the time. When I was informed the wood was not entered at the Custom fornia that this imaginary grievance and the House and could not be landed, I asked the Captain abuse complained of,-equally imaginary-as- to see the Collector and get permission if possible to land the wood on the wharf, as we wished the vessel discharged. I certainly had no idea of the value of en to the former idea by Mr. Sherman, as we that lot of wood, and know that Capt. Jenks had no have said above. His presidential aspirations suspicion about the matter, he supposed his cargo was

As to making a convenience of the mythical chinaman; it cannot be done. Other people may, and do make a convenience of each other; so do the Chinaterests of the South are endangered by Hawaiian man of other people; but there is no reciprocity in

In regard to the amount of Opium by the Kalakaua this agitation is absurd, whether viewed from a re- this time as being double that of last voyage; the point is not well made. Just what a chinaman may do or what risks he will take in the opium business, tioning statements which imply that the I cannot say; but I feel certain that if the man who Kanakas are getting away with the great singar interests of the United States. A given away in such a manner as has been the case the parties be satisfied with that decision, then the Receiver is moment's reflection must show the absurdity of in a good many instances of late, he would not try and time, and would or ought to be ve chary about the word "opium," forever after.

As to the wood being placed below the cargo, that was so intended. To place firewood on top of cargo would seem strange to intelligent persons, to

I feel certain the Gazette man, like myself, regrets he should have written an article throwing out suspicion, without knowing facts.
